2. The package was examined and operated for the benefit of the visitors, after which a detailed description of the limiting factors on performance was given by [redacted]

3. The following decisions were reached regarding Perkin-Elmer pending requests for support:

25X1

a. The C-123 with the Type IA package will be delivered to [redacted] [redacted] by the present crew, who will be "O" briefed by security for the purpose. Perkin-Elmer will send in an outline of the proposed movement including where the aircraft will land for refueling, what security precautions will be taken on the trip, how long it will be on the ground at [redacted] what other cargo will be carried and what other passengers besides the security officer will go with it. Trip to be coordinated by [redacted]

5. Construction of the clean room is progressing satisfactorily - about 80% complete.

6. The NFIC visitors were impressed with the steps taken to ensure the ultimate in resolution, but general consensus was that difficulty might be expected in maintaining equipment of this level of sophistication in the field.
